

Men's Health Awareness with **MSK Direct**

Learn about prostate screening and what's right for you.

Prostate cancer is the second most common cancer among men in the U.S., especially for those over the age of 45. A simple PSA blood test can help find prostate cancer early. In less than 5 minutes, you can take a screening assessment and learn the risk factors associated with developing prostate cancer, such as age, family history, race, and ethnicity can help lower fear and uncertainty commonly associated with this disease.

To start now, visit mskcc.org/nycdcc/screening. If you or a family member are impacted by cancer and would like to discuss treatment options at MSK, call your dedicated MSK Direct phone line for NYCDCC: **833-786-3368** or visit mskcc.org/nycdcc.
